2. MEDC

- a. Beginning in the fall of 1970 we plan to increase the active participation of Midcareerists in two ways. First, through pre-course discussion with seminar leaders and by careful briefing of the Midcareerists, we intend to emphasize the students' responsibility for ensuring that these seminars are more than mere lecture cum question-and-answer sessions. Second, we intend to experiment with the idea of encouraging some carry-over from the Grid week to Phase II of the course. Specifically, we will provide several blocks of time in which student teams can review and modify the "Organization Culture" paper (produced at the end of the Grid) in light of information acquired during Phase II. The end result of this scheme should be a more tightly drawn, carefully considered, and

realistically based statement of major barriers to organizational excellence, the underlying causes, and suggested steps toward removing the barriers.

- ✓ b. We are arranging discussions this summer with officials at Malmstrom Air Force Base, Montana, and the Manned Spacecraft Center, Houston. At Malmstrom our efforts will be directed toward assisting in the planning for our first visit (MEDC #25) to that installation, a visit which we hope will provide insights to and understanding of the ABM system as well as the type of coverage of the Minuteman system which we have been getting at Warren AFB in Cheyenne. At Houston our objective is to encourage a strengthening of the usual briefings and tour of the facilities in preparation for the visit of MEDC #26.
